INTRODUCING THE FLUX POWER CHARGER

High Frequency Charger

Charger Solutions Customized to Meet Your Material Handling Power Needs

Conventional, Opportunity and Fast Modular Chargers

The Flux Power Charger will have its own control boards and power modules, resulting in unparalleled quality control — creating the most reliable battery charger in the industry.

Our charger is made in partnership with Power Designers.

24V–80V
Multi-voltage, multi-amp

3 Modes
Conventional, opportunity & fast

Modular & Scalable
Flexible design lets you upgrade power output in the field.

Multi-Voltage, Multi-Amp
24V, 36V, 48V & 80V options.

Flexible Charge Modes
Programmed for conventional, opportunity & fast charge.

Key Features

Pre-Programmed Settings
Delivered ready for immediate use; available with AC cords and plugs.

Power Limiting
Manages load during peak hours, with a delayed-start option.

Smart Equalize
Automatically completes missed equalizations.

No Primary Module
Power modules are used evenly over the life of the charger.

Filterless Design
Eliminates the need for quarterly maintenance.

Active Arc Reduction Technology
Minimizes arcing during frequent opportunity-charge connections, protecting connectors and operators.
