HOW FLUX POWER TECHNOLOGY MAKES THE DIFFERENCE

BATTERY MANAGEMENT SYSTEM (BMS)

The integral BMS, which is UL Listed, was designed and developed in-house, assuring a fully optimized solution for demanding material handling applications. The patented BMS software ensures the battery provides peak performance at all times when in operation (even at low charge levels), delivers longer run times between charges, and maximizes the total battery lifespan. All Flux Power batteries are designed and built to meet UL standards.

FULL FEATURES

The modern clean design supports superior functionality to allow easier and more efficient use by operators:

- Accurate battery discharge indicator
- Low state of charge buzzer
- IP 56 rating for power washing

LITHIUM-ION CELLS

Flux Power has optimized the safety and performance of lithium-ion for material handling equipment and other industrial applications. Lithium Iron Phosphate (LiFePO4) cells were selected because they are one of the safest choices compared to other lithium-ion chemistries.

OPTIONS

- Integrated heaters for cold temperature applications
