

SkyBMS

Cloud Based Telematics and Asset Management

SkyBMS delivers insight into your equipment fleet's usage so that you can make more informed decisions to maximize your operational efficiency.

FLEET PERFORMANCE

The in-house designed SkyBMS telematics integrates with the Battery Management System (BMS) to collect battery pack insights and translate data for customer benefits.

Through the web portal, battery pack performance metrics are displayed:

- State of Charge (SoC)
- Usage patterns
- Voltages
- Temperatures

Fleet Dashboard

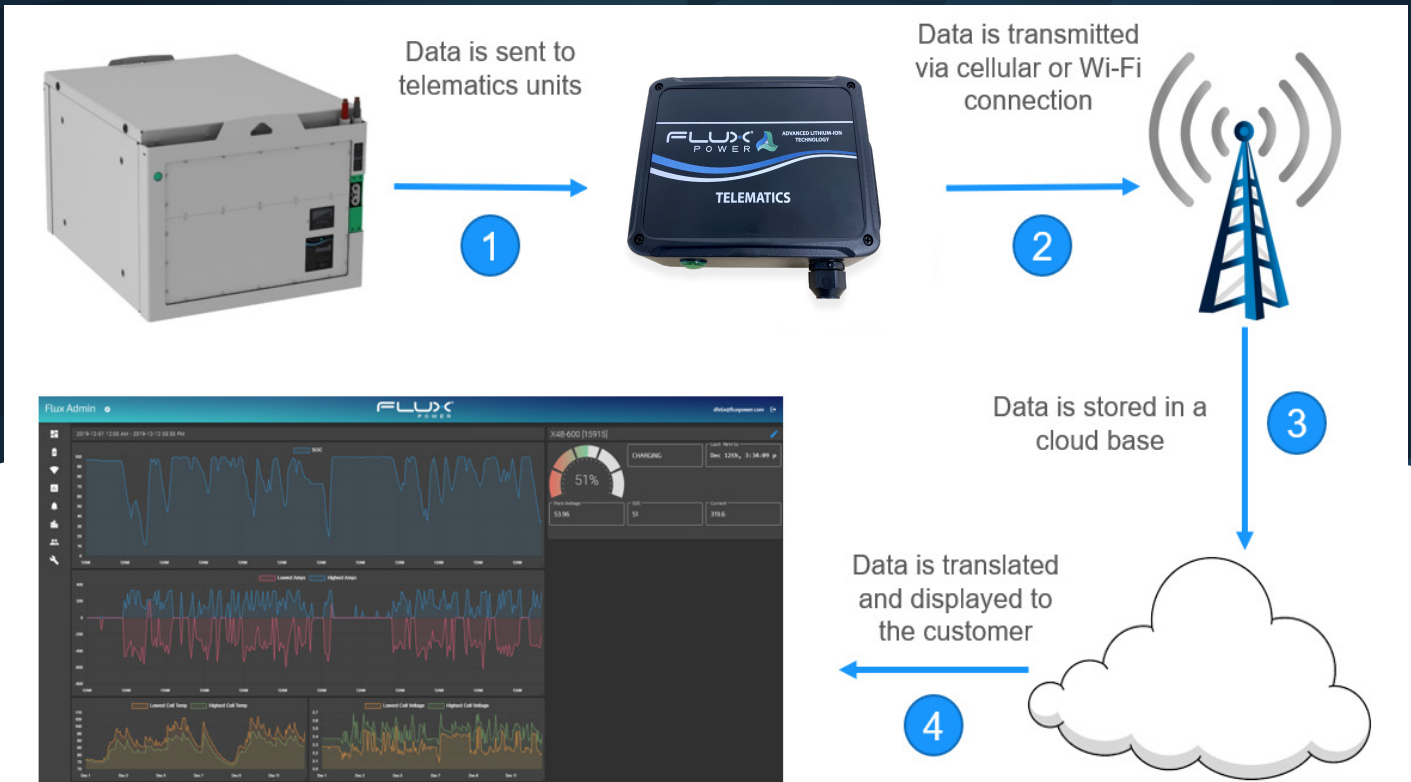

Weekly / Monthly Report

Battery 'Deep Dive'

fluxpower.com

FEATURES

- Password-protected account
- Log-in based permissions and functionality (Admin / User / Viewer)
- Saves 1 month of full debug data locally
- Wi-Fi / Cellular / Bluetooth compatibility
- UL Listing (UL991 & UL1998 standards)

BENEFITS

- Summary of energy usage
- Generate custom alerts to notify multiple users of battery condition
- Allows Flux Power Product Support to diagnose issues remotely
- Data can be aggregated, to identify over or under utilized batteries to optimize operator practices
