

Come work as a Project Manager at a growing company that offers great benefits with opportunities to advance and learn alongside accomplished business leaders ... Become a part of our team!

Get to Know Us

Flux Power develops advanced lithium-ion batteries for industrial uses. Flux Power solutions utilize its proprietary battery management system (BMS) and in-house engineering and product design. Flux Power batteries deliver improved performance, extended cycle life and lower total cost of ownership than legacy lead-acid solutions. Flux Power sells primarily to equipment OEMs, their dealers and battery distributors. Current products include advanced battery packs for motive power in forklift equipment, stationary power for solar storage, and airport ground support markets.

About the Role

The Project Manager will lead and individually contribute to multiple, cross-functional projects to help new product development and other projects to successful on time completion. This experienced, dynamic, technical project manager will be a key member of the team and will work with a broad team across multiple functions. They will work within the constraints of budget, schedule, and scope while managing risk and ensuring adherence to established processes and methodologies.

What you Will be Doing

- Define and prioritize new projects to help accelerate growth and success of our business.
- Lead, facilitate, and coordinate day-to-day activities required to ensure product development and launches are completed on time.
- Successfully work with teams of cross functional subject matter experts in a highly matrixed organization with frequent communication and status updates.
- Actively use product management tools to independently manage projects, maintain visibility of project status, and track project milestones.
- Facilitate team dialogue to identify critical path, all project execution risk, and manage mitigation strategies/ plans.
- Clearly communicate and present project milestones, challenges, and key decisions to various stakeholders, including CEO and provide situational awareness to senior management.
- Performs other related duties as assigned

What you Will Need

- Bachelor's degree in Engineering, Technology, Business, or a related field.
- Project Manager certification.
- 5+ years of project management experience.
- Experience leading engineering projects (mechanical/electrical) and achieving product certifications / approvals.
- Understanding of key quality systems & tools: eg change management, design reviews, V&V, FMEA, design controls, and APQP/PPAP.

- Exceptional analytical, quantitative, problem-solving, and critical thinking skills with an astute attention to detail and accuracy.
- Outstanding written and verbal communication skills, able to articulate equally with technical, business, and other key stakeholder audiences
- Desire to continually learn about and understand our products and customers with a pro-active, hands-on attitude.

Other Duties

Please note this job description is not designed to cover or contain a comprehensive listing of activities, duties or responsibilities that are required of the employee for this job. Duties, responsibilities, and activities may change at any time with or without notice.

What Can We Offer You for All Your Hard Work?

Benefits
